PRINT

EJ-640

SOLJET EJ-640

High productivity with low running costs

The SOLJET EJ-640 delivers high-quality productivity and profitability that the nearest competitor models simply cannot provide. With operating costs that offer significant savings, you'll be able to grow your margins and your business. With its sturdy industrial design, the EJ-640 is the ideal production machine for busy high-volume print shops, and is ideal for the production of posters, banners, fleet graphics, signs and more. It features dual staggered printheads, an advanced media system for long unattended print runs and an integrated tri-heater system for fast drying. The EJ-640 runs optimally with high-capacity 1 litre GREENGUARD Gold certified EJ INK in dual CMYK or CMYKLcLmLk configurations to deliver bold, exciting colours. Powerful Roland VersaWorks Dual RIP software is included.

VersaEXPRESS RF-640

Productive print at an affordable price

The RF-640 4-colour eco-solvent printer offers impressive productivity and reliability at an exceptional price. Roland's most affordable 1625mm printer delivers outstanding prints day in and day out. Produce banners, posters, wraps, signs and more. The RF-640 features a mirrored CMYKKYMC printhead configuration for maximum quality, GREENGUARD Gold certified ECO-SOL MAX 2 inks and Roland VersaWorks Dual RIP. To boost productivity, front-loading ink cartridges can be replaced without stopping the printer and for uninterrupted unattended production, the RF-640 automatically switches to a new ink cartridge when the original is empty. Remotely manage production, test printing and cleaning functions with the Roland Printer Assist app.

RF-640

Roland DG is a market-leading manufacturer of digital wide format inkjet and sublimation printers, cutters, printer/cutters, 3D printers, inks and software whose world-renowned reputation is backed up by unrivalled training and support. Preferred for their unbeatable reliability, versatility and quality, Roland devices produce stunning outdoor and indoor applications including signs, banners, posters, labels, vehicle graphics, POS displays, customised merchandise, industrial personalisation and much more. Roland DG technology is distributed by an extensive network of professional and experienced authorised dealers.

INTEGRATED PRINT & CUT

SOLJET PRO4 XR-640

High speed integrated print & cut

The XR-640, Roland DG's fastest and most productive integrated printer cutter, lets you print and cut signs, banners, decals, vehicle graphics, and more, with speed and precision. Two mirrored in-line printheads maximise productivity and quality. The XR-640 also features an integrated tri-heater system for fast drying. and GREENGUARD Gold certified ECO-SOL MAX 2 inks, available in four configurations including CMYK, Lc, Lm, White, Metallic and Light Black. Includes Roland VersaWorks Dual RIP software.

XR-640

TrueVIS VG-640 and VG-540

Put more life in your prints

With the TrueVIS VG series, integrated print and cut is more efficient and productive than ever. Available in 1625mm (VG-640) and 1371mm (VG-540) widths, the VG Series has four FlexFire printheads that deliver precision droplet placement, a higher firing frequency and truly stunning print quality at production speeds. GREENGUARD Gold certified TrueVIS INK offers a wide colour gamut, outstanding image quality and impressive colour results. Available in 4-colour, 7-colour or 8-colour configurations. Powerful cutting technology maximises accuracy and a Bluetooth enabled mobile control panel offers remote printer management via your smartphone or tablet. Includes Roland VersaWorks Dual RIP software. Deliver dynamic decals and labels, vibrant vehicle and wall graphics, striking signs, banners and much more.

VG-640

Tablet not included

TrueVIS SG-540 and SG-300

Build an unbeatable business

Up to 60% faster than previous comparable models, the SG-540 (1371mm) and SG-300 (762mm) printer cutters deliver Roland DG's renowned quality, reliability and cutting-edge features, at an exceptional price. If you're just starting out, the SG provides the versatility and ease-of-use you need to attract customers and start making money, fast. If you are looking to extend your current production, you can expand the profitable range of products you offer. Two FlexFire printheads work in synergy with GREENGUARD Gold certified TrueVIS INK in CMYK configuration for outstanding image quality and colour results. Advanced cutting technology delivers superb accuracy and downforce and a Bluetooth enabled mobile control panel allows remote printer management via your smartphone or tablet. Includes Roland VersaWorks Dual RIP.

SG-540

Tablet not included

INTEGRATED PRINT & CUT

VersaSTUDIO BN-20

Print and cut from your desktop

Compact and versatile, the BN-20 is a powerful profit-making device, ideal for printing garment heat transfers, stickers, labels, small signs, posters and more. With a media width of 515mm, the BN-20 desktop printer/cutter is available in CMYK, CMYK+White and CMYK+Metallic Silver options. Includes Roland VersaWorks Dual RIP software.

SUBLIMATION

Texart RT-640

The first step in sublimation

If you are looking to get into dye sublimated soft-signage, apparel, décor, promotional goods and other highly profitable applications, the RT-640 1625mm dye sublimation transfer printer is the ideal solution. Combining superb quality, productivity and value with ease-of-use, the RT-640 is available in 4-colour configuration for higher speed printing or 8-colour mode for a wider colour gamut and smooth colour gradients. Texart Fluorescent Pink and Yellow inks and the Roland DG Fluor Color Library offer hundreds of eye-catching colours. For uninterrupted production in CMYK mode, the Roland Ink Switching System automatically switches to a backup ink pouch when the primary pouch runs out. Also includes a choice of ErgoSoft Roland Edition 2 RIP software or Roland VersaWorks Dual RIP, and Roland Printer Assist app for easy print management.

Texart XT-640

Simply powerful dye sublimation printing

Built for long print runs and non-stop production, the Texart XT-640 (1625mm) dye sublimation transfer printer is designed for high-volume production of soft signage, fashion, sportswear, promotional goods, and more. Dual printheads optimise production and image quality, while the automatic ink switching system and Roland Printer Assist app enable unattended printing. Available with Texart ink in four colours (dual CMYK) for high-speed printing or in eight colour configuration (CMYKLcLmOrVi, CMYKOrViFpFy) for an incredibly wide colour gamut. For error-free media alignment, the XT-640 features an advanced feed adjuster, precision take-up system and powerful vacuum. Includes Ergosoft Roland Edition 2 RIP software.

UV

VersaUV LEF-300, LEF-200 and LEF-12i

Customise, personalise, brand virtually any substrate or item

The VersaUV LEF range of benchtop UV printers is used by professionals worldwide as a cost-effective solution to print directly on substrates and objects up to 100mm in height. Print full colour, high resolution images and text on a wide range of substrates including acrylic, wood, board, plastic, fabric, leather, eco-leather, metal* and glass*. The VersaUV series offers the efficient customisation of branded merchandise, industrial goods, product prototypes and much more. ECO-UV ink is available in CMYK plus Gloss for unique textured effects and White for brilliant spot colour and bright colour quality on dark or clear surfaces. An optional on-board primer with the LEF-200 and LEF-300 further increases efficiency by streamlining the print process on materials such as acrylic and plastic.** Includes Roland VersaWorks Dual RIP software.

Maximum print areas: LEF-12i: 305mm x 280mm, LEF-200: 508mm x 330mm, LEF-300: 770mm x 330mm.

* Primer may be needed for certain applications.
**Primer ink adhesion may vary depending on substrate and conditions. Testing ink adhesion prior to production is recommended.

LEF-200

LEF-12i

LEF-300

LEJ-640

VersaUV LEJ-640

UV-LED printer for rigid materials and rolls

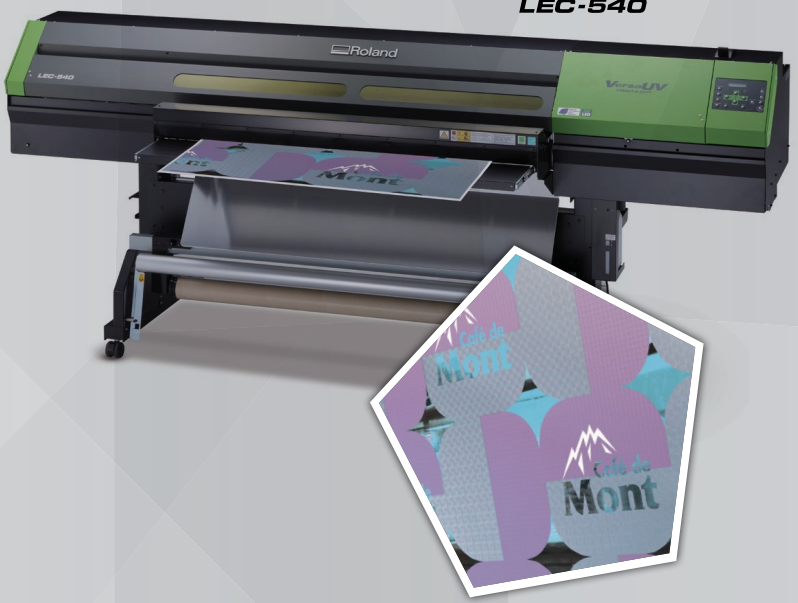

The VersaUV LEJ-640 (1625mm) prints CMYK, White and Gloss ink on roll or flat materials up to 13mm in depth. Handles large rolls up to 40kg in weight and sheets up to 12kg. The UV-LED lamps dry ink instantly and release no heat, making it possible to print on heat-sensitive materials. Offering impressive versatility for the production of a huge range of large-format graphics such billboards, signs, packaging prototypes and much more. Includes Roland VersaWorks Dual RIP software.

VersaUV LEC-540 and LEC-330

Print, emboss, crease and contour cut with a single device

With the 762mm (LEC-330) and 1371mm (LEC-540) VersaUV LEC printer cutters, it is easy to create realistic proofs, vibrant packaging prototypes and short run labels on a variety of substrates, in one seamless workflow. The LEC prints CMYK, White and matt or gloss layers to add special effects and a luxurious finish to customised graphics. Direct print on a wide range of media, including standard sign media, foils, clear and metallic stock, synthetic and natural leather, textiles, window coverings and BOPP, PE and PET film. Also prints on semi-rigid sheets such as card stocks and polycarbonates up to 1mm thick. Includes Roland VersaWorks Dual RIP software.

LEC-540

VersaUV LEJ-640FT

UV-LED flatbed printing at up to 150mm in height

The VersaUV LEJ-640FT UV-LED flatbed printer enables direct printing of ECO-UV CMYK, White and Gloss ink on objects and flexible and rigid materials up to 150mm in height and 100kg in weight. With a large print area of up to 1.6m x 2.4m, the LEJ-640F is ideal for a wide range of applications including signs, displays, fine-art graphics, interior decoration items, promotional goods and packaging prototypes. Add value and creativity to your output with ECO-UV White and Gloss inks. Print crisp eye-catching graphics on a range of coloured and transparent substrates and layer clear ink to create textures, embossing, gloss and matt effects. Includes Roland VersaWorks Dual RIP software.

LEJ-640FT

CUT

GR-640

CAMM-1 GR-640, GR-540 and GR-420

Cuts more. Cuts faster. Cuts tougher.

The new CAMM-1 GR series takes cutting productivity, precision and strength to the next level. Delivering up to 1,485mm per second, the GR cutter boasts the fastest throughput in its class and delivers an impressive 600g of downforce to cut through difficult media with a single pass. Performance-enhancing features include an intuitive overcut function to deliver sharp, clean corners on challenging media and a dual position cutting carriage for standard and perforated cutting, ideal for die-cut decals. GR cutters offer incredible versatility in terms of media compatibility and electronic pinch rollers with 10 pressure settings to handle soft flock, thin window tint, thick reflectives and more, with ease. Produce an impressive range of applications including window and floor graphics, signs, labels, packaging prototypes, vehicle graphics and more. The GR series is a great addition to any business; either as a stand-alone cutting solution or paired with an existing printer. 1,651mm (GR-640), 1,397mm (GR-540) and 1,075mm (GR-420) models available. Includes Roland CutStudio software.

CAMM-1 GS-24

Cutting performance to build your business on

With its redesigned cutting carriage and blade holder, the GS-24 offers higher stability and 40% more downforce than its predecessor (up to 350g) to cut even tough materials such as flock and flex. The overlap cutting function (up to 10x) enables the easy, precision cutting of thicker media including sandblast material and card stock. Other useful features include perforated cutting functions plus the option of cutting per line colour. Cut precision graphics up to 584mm in width to produce vehicle wraps, signage, stickers, textile transfers, packaging prototypes and more. Designed as a desktop device, the GS-24 can also be mounted on a stand. Includes Roland CutStudio software.

GS-24

STIKA SV-15, SV-12 and SV-8

Portable and affordable precision desktop cutters

Available in 160mm, 250mm and 340mm cutting widths, the user-friendly and compact STIKA series cuts vinyl for signs and stickers, textile transfers, films and more. The provided CutStudio software can split up designs, to enable cutting of larger designs.

Roland DG Care

Roland DG Care is a complete range of premium services and products to help our customers throughout the lifecycle of their experience with Roland DG. Some of the services offered as part of the program are comprehensive training solutions, industry leading warranty programs and dedicated finance programs.

www.rolanddgcare.com.au

Roland Academy

Roland Academy offers specialised training to assist our customers to get the most out of their Roland equipment and maximise the return on their investment.

Our VersaWorks training courses, as part of Roland Academy, have been developed to meet the expanding needs of the Print Professional. The courses focus on competency-based training to help students develop their skills and take their knowledge of Roland VersaWorks, Roland VersaWorks Dual and colour management to the next level.

www.rolanddg.com.au/academy

Roland*Clinic*

Roland*Clinic* sessions are free one-on-one consultations with our Roland technical and product specialists. You can bring along materials, files and any questions or issues you have, that our experienced staff may assist you with.

Roland*Clinic* sessions are free and are hosted every Friday, 9.00am to 5.00pm (except public holidays), in the Roland DG Australia head offce in Frenchs Forest, Sydney. For customers outside these areas who cannot attend in person, the sessions can be hosted remotely via video conference. The sessions are also held at various industry trade shows and events. To register for Roland*Clinic* visit the link below.

Roland Cartridge Recycle Program

In partnership with Close the Loop, we have structured our Cartridge Recycle Program to ensure the simple and efficient collection of empty Roland inkjet cartridges. In collaboration with the Roland DG dealer network, the cartridges are collected and returned to Close the Loop, Australia's largest recycling and resource recovery company for imaging consumables.

Driven by a philosophy of zero waste to landfill, Close the Loop reuses or recycles 100% of every inkjet cartridge that we return to them.

Simply drop your cartridges at your local dealer, give them to an Authorised Roland technician at your next scheduled service, or contact us for further options. The empty cartridges will then be packaged up and sent to Close the Loop for processing.

www.rolanddg.com.au/recycle

Industry Leading Warranty

There's no question that Roland DG wide format inkjets combine unbeatable performance with legendary Roland reliability. As further proof, Roland DG offers an unprecedented Three and Five-Year "Heads and all Warranty" program for selected products.

When you register your Roland DG wide format inkjet within 30 days of installation, you are eligible for an additional 2 or 4 years of Roland DG Care Extended on-site service guarantee. All you have to do is ensure that your inkjet system uses our premium OEM inks and is serviced regularly and in accordance with the product maintenance schedule by authorised Roland Service Technicians.
